TUESDAY, JULY 20, 1926.

### The Same Old Ideal.

Trade treaties negotiated by the Mackenzie King Government with Australia, the West Indies, France, and other countries are denounced as arrangements under which Canada gives more concessions than it gets.

The trade treaty negotiated by the Laurier Government with the United States was denounced as an arrangement under which Canada got less than it gave.

When did Canada ever negotiate a trade treaty with any country that was not denounced by the doctrinaires of high protection as a scheme to ruin Canadian industry, or to give aid and comfort for the benefit of foreigners?

The ideal of the Meighen Government in 1926 is the ideal of the Laurier Opposition in 1911. That ideal is a Canada in which the tariff is a protective tariff, inside which Canadians must buy goods at artificially boosted prices out of the proceeds of products sold abroad at prices artificially depressed by like excessive tariffs.

### A "Clean Out," Not a "Clean Up."

Departmental administration follows the lines of tradition in the interpretation and enforcement of the tariff, and in the exercise of clemency toward offenders.

Canada probably never had a minister of customs who did not to greater or less degree use his authority, supported by the law, to stay proceedings against breakers of the customs laws.

Evidence put before the parliamentary committee tends to show that if Canada ever did have such a minister, it was long ago that he, for example long since ceased to be the standard of conduct for successors of other political persons.

Conservative members who sat in judgment to condemn Hon. G. H. Holm did so knowing that the Azil case never had occurred if preceding ministers, Conservative and Liberal, had had the moral courage to break with tradition and establish the rule that there must be no interference to save smugglers from punishment.

And the Progressives who bolted their party to join in the opposition, knowing that they were condemning a new minister for following in that instance the example of experienced predecessors of all complexions whom he unwisely assumed to be better models than they were.

There was no occasion to deliver the country into the hands of the high tariff interests in order to "clean up" customs department. The Mackenzie King government pledged to that by word and by self-interest, as plainly as the Meighen government is or could be pledged.

The bolters may have been deluded, or may have deluded themselves, into the notion that they were voting to clean up the customs department. What they really were voting for was to clear out the Mackenzie King government, and with it the low tariff policy they were sent to Ottawa to support.

### Our Millionaire Ministers

The Meighen cabinet includes five gentlemen who are reported to be the lucky possessors of a million dollars' worth of this year's gear each.

The Millionaire Ministers are: Hon. A. Black, Sir George Paish, Hon. R. B. Bennett, Hon. J. D. Chaplin and Hon. R. B. Bennett.

One of the five has been placed in charge of the administration of the Railway Department. Another is Secretary of State.

A third is Minister of Finance. Another is Minister of Trade and Commerce.

The fifth is Minister of Public Works and Railways. Among them the five have taken possession of those departments whose chiefs have most to do with shaping Governmental policy, and are in position to control the lion's share of the prestige, and the determination of Government policy, and few opportunities to pose in the limelight.

There is nothing inconsistent in the chief posts in a Meighen Government being occupied by gentlemen whose wealth identifies their interests with those of railways, banks, manufacturers and powerful corporations generally. This is as it should be.

The Meighen Government does not exist to govern Canada with the primary object of bettering the conditions of the work-a-day mass of the people.

It's first business in life is to protect and promote the interests of certain classes—at the expense of the mass when that is necessary, or when it is demanded.

No doubt the Meighen Government would have been made up exclusively of millionaires if there had been enough of them to go round who would take jobs, and who carried enough political standing to be considered assets and not liabilities.

The public can have no quarrel with these Ministers because they have been fortunate enough to acquire wealth, so long as they got it honestly.

Now is Mr. Meighen to be blamed for filling the seats of the mighty with men whose passions and sympathies must keep them constantly in mind of the purpose for which his Government exists.

But what the business man, the salary-earner and the wage earner in town, and the farmer in the country, has to consider is whether a cabinet composed of men whose "corporate" interests is likely to satisfy the requirements of the country from its standpoint, and to formulate public policy for its benefit.

## Just Folks

by Edgar A. Guest

### Little Miss Curious

Little Miss Curious, Little Miss Prey,  
Little Miss What's That and Little Miss Why,  
Little Miss Tell Me and Little Miss How,  
Would I could settle your problems right now,  
But wait for the answers. They'll come in their turn  
And some of them you must grow up to learn.

Little Miss Question First, flowing me fast  
Wanting to know all of this and of that,  
Why did the doctor give me a bottle of medicine?  
Why does he let little children be bad?  
Why is it that the people who brought me to you  
Bring me a little little baby, too?

What makes the whiskers come out on your chin?  
Grandma has teeth she takes out and puts in.  
How did she get them, and why does she need  
Glass when she sits down to read?  
Little Miss What's That, I can't explain,  
Half of the problems which trouble your brain.

Little Miss Curious, Little Miss Prey,  
Little Miss What's That and Little Miss Why,  
Come with your questions and wide-open eyes,  
I'll do my best, though I'm not very wise.  
For even I wonder, as you grow to be,  
And am puzzled by things I am too young to know.

### Dr. Crane's Editorial

#### POPE'S KINGDOM

One of the strangest anomalies of modern times is  
reminiscent of Henry Ford.

Ordinary men of great accumulation of money would  
be called upon to do so.

Mr. Ford has not seemed to have any cut of his  
to publish the public. He attacked the Jews, he  
was the largest, most successful, and most honest  
businessman, and he seems pretty generally to have  
been a benefactor in the sense of multitudes of  
men. He has always treated labor more than fairly  
and with a generous and paternalistic spirit.

Yet a recent writer points out that he is worth  
probably more than a billion. His profits last year  
were a hundred and fifteen millions, which is the  
power of two billions.

There has never been a private fortune like this  
before in the history of the world.

Up to the world, much of the wealth of many a nation  
has been in the hands of a few. It is in the hands  
of all Bulgarians, Finland or Hungary. It is worth as much  
as the wealth of any of them.

It is worth more than Norway and  
almost as much as the United States.

For this vast accumulation has grown according to  
the law of the market. It is the product of the  
immense manufacture and sale of a necessary com-  
modity, and it is the result of the production of  
automobiles.

### Do You Remember?

#### FORTY YEARS AGO

Edmonton Bulletin, Saturday, July 17th,  
1886.

# HOME BUILDERS PAGE

## BUILD THIS YEAR

While prices are low and building conditions ideal

THIS will be a year of extensive building in the Edmonton district and there is good reason for it. Every indication is that a banner year is beginning here—A year of exceptional tourist travel, of phenomenal activity in the development of the rich natural resources of this province, particularly oil; of early and abundant crops and increased market facilities. Real estate values will advance to figures which are but the beginning of a tremendous and constant rising movement—A rise based on fundamental and intensive worth. . . . Men and women of proper spirit desire to own a home that properly represents their progress and standing in the community. Such neighborhood ambition is right and worthy. . . . Home ownership not only fosters the family spirit, the traditional solidity of our people, and engenders the happiness and comfort that is derived from the institution of the family. It means also an improved standard of living. . . . And today more than ever home ownership is an investment that will reap rich rewards in the near future. Edmonton homes will be desired, they will be valuable. Build now—build substantially, choose your materials carefully, build for the future. But build in the present—now—today. . . . The firms on this page will give you sound advice and fair dealing.

### COZINESS, ECONOMY, GOOD TASTE, LOW COST

Can you imagine a prettier little house than this four-room colonial one? Either side makes a good frontage. The big porch is not the expense that many porches are, for the posts are slender and the balustrade is well designed. Shutters are used at the first-floor windows and blinds above. Of course there are small-paned Colonial windows.

The six-paned wood door which is the entrance leads into a vestibule. There is a coat closet with wardrobe here. The living room has one whole side of the first floor. Many windows make it cheery. Its main architectural feature is the open stair at one end, delicate in detail and beautifully finished in mahogany and ivory. The man of the house is sure to appreciate the handy passage from the living room to the basement as well as to the kitchen and rear entry.

A dining alcove supplements the four rooms. It opens off the front vestibule, and is a very pleasing feature. Built-in dresser and work-table add to the convenience of the kitchen. The sink is placed below a window. There is room, too, for stationary table, if desired.

Two bedrooms upstairs have windows on two sides, so they are beautifully ventilated and sunny. Each room has a charming-line arrangement of truss built-in. There are three closets, and a built-in linen closet.

A full basement is provided, with a heater room and coal room at the rear, and drying room and storeroom at the front.

Any family who can get along with two bedrooms will do well to study this practical little plan. Standard stock materials can be used all the way through. And the pleasing exterior will be in good taste in any community. The cost should approximate \$5,700.

### PLANS SUPPLIED

Detailed plans and specifications of this house may be obtained at low cost by writing to the Home Plan Editor of the Bulletin.

# Centenarian Presents Park on 100th Birthday; Old Fort Henry

SIR GEORGE HIGGINSON, who celebrated his 100th birthday by presenting a large estate to the public for a park. He is the oldest general in the army, the oldest Eton boy, and the oldest Guardman living.

MAJ.-GEN. SIR GUY BAINBRIDGE, Capt. H. de R. Morgan, Col. Findley and eight men of the party of "Bully", who came to Toronto to celebrate Sir Henry Pellatt's 50th anniversary with the Queen's Own Rifles.

BELOW: Mrs. Robert driving her Shetland pony, "Horse of Bames," a prize-winner at the Richmond Royal Horse Show.

UPPER RIGHT: OLD BERKELEY coach at Richmond Horse Show setting out from Hyde Park.

THE BISHOP OF LONDON, Dr. Winnington-Ingram, gave a garden party to celebrate his 25th anniversary in his diocese. He is shaking hands with one of his guests.

SUMMER bathing float: Flat boat-shaped board with canvas seat let into centre.

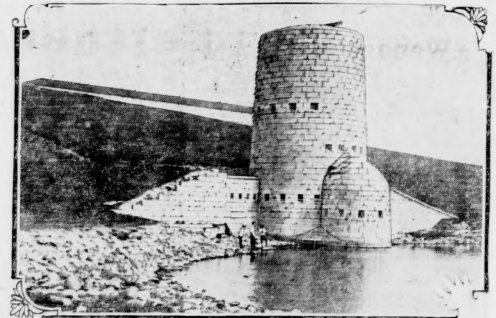

LONE SEAMAN named Butters astride one of the pontoons used in raising the submarine S51, sunk nine months ago off New London, Conn. When the sub. was brought to the surface the grating broke and it went again to the bottom. To save the pontoon the seaman had one minute to close the air valves in a rough sea. He did it, after swimming through the rough seas to reach it.

LIEUT.-COMMANDER BYRD, who flew over the North Pole, was met by his mother on arrival in New York, who was the happiest of women over his return. Commander Byrd was escorted to the city hall and officially welcomed there.

ASCOT cost of maroon worn with printed chiffon dress trimmed with rose satin panels. The skirt is gathered and the jumper top has a fichu scarf of same material.

TWO VIEWS OF FORT HENRY, at Kingston, one of the oldest historic landmarks in Canada, which is crumbling to ruin to-day. It was built in 1832, and was a strategic centre during the rebellion of 1837-38. Above is shown the general view of the fort with its Martello-like tower. Below, the fortifications are seen to be crumbling into the moat which forms a part of the defense.

KEEP THIS ANNOUNCEMENT FOR FUTURE REFERENCE

# VISION

**Will you be RICH or POOR?  
It depends largely upon  
your VISION.**

**C**AN YOU clearly see the conditions composing the oil situation in Alberta today? Can you read and interpret them and construct them into the bold picture of the future? Have you vision?

First you must see these conditions clearly. Here is a great area upon the eve of a big petroleum production—geologists freely predicting that it will be the world's greatest oil field, practical men proving up the structure, the attention of the "powers that be" in the industrial world fixed upon it.

You must then consider what this means. . . . Industry eagerly alert for the precious fluid, searching the globe for the hidden sources of the vital stuff which turns the wheels of the world.

**C**ONSIDER that Canada is paying \$120,000,000 a year to foreign countries for gasoline and petroleum products; that Alberta, with one well alone producing more gasoline than all the rest of Canada together, and with billions of dollars worth more under ground, is sending millions of dollars abroad to buy the product of foreign wells and refineries.

Consider that this money can be kept in Canada, much of it right here in Alberta, if we have the vision and enterprise to manufacture our own gasoline from our own crude oil. . . . Alberta Refineries Limited, a local company, is producing "Pep" gasoline from the

crude oils of the Wainwright field, right at our door. The demand exceeds the present supply and the plant is being extended.

**R**EFINERIES DISTRIBUTORS LIMITED, a company organized to market and distribute "Pep" products, to build and maintain "Pep" Service Stations and to extend these as fast as production is increased, now comes into the field to assist in this production.

This company will erect a "Cracking Plant" which, by means of a new scientific process, will extract from 50 to 70 per cent of gasoline from the Wainwright crude oil.

Refineries Distributors Limited will help to retain in Alberta the money that has been paid to foreign producing and refining companies. Its scope is wide, and in this pioneer basic industry lies one of the finest opportunities for Albertans to profit from the natural resources of the province.

**C**ONSIDER these conditions carefully. Bring your faculties of vision to bear upon them. Can you see the trend of future events?

Exercise your qualities of courage and enterprise. Do not throw aside or put off the impulse which follows your consideration of this opportunity to participate in the glorious future of Alberta.

*"Among the faculties of mind which distinguish the rich man from the pauper, the most outstanding is Vision—the ability to see clearly conditions as they exist, to realize their significance, and to reason from them the trend of future events....Almost without exception, rich and potentially rich men are endowed with Vision....Poor men are noticeably deficient in Vision"*

"When the Standard Oil Trust was dissolved, it developed that 80 per cent of the profit in petroleum was made by the refining end."

"Petroleum is one of our most valuable natural resources. . . . The refining of petroleum must become our foremost industry."

Early day gold seekers overlooked the rich sulphide ores which were almost pure gold, but which did not glitter. . . . Modern Science touched them with her magic hand. Millions of dollars were taken from the rocks of Goldfield, thrown aside by the placer miners looking for seeds of yellow gold. . . . Think this over!

**Vision and Enterprise are the qualities  
which make men rich. Exercise them now.**

### + Wonderful Work of the Cracking Plant

Prof. Gustav Egloff of the Universal Oil Products Company Research Laboratories, in a lecture before the American Institute of Mining and Metallurgical Engineers, spoke emphatically upon the wonderful economy and value of the "Cracking Plant" in the production of high grade anti-knock gasoline from crude oil.

"PEP" has justified its name as a lively, volatile, anti-knock gasoline which motorists insist upon after once having used it. Today the present "PEP" plant is inadequate for the demand.

He claimed and showed by tests and actual production in many fields, that by the Dubbs process, from 50 to 70 per cent gasoline is extracted from the crude and showed that from the Kevin Sunburt crude this percentage is always obtainable. The heavier crude from the Smackover field is mentioned as showing "the wonderful potentialities of this process."

"One of the wonder oil fields of the United States is the Smackover Arkansas, which is still producing 180,000 barrels per day, of which 163,000 barrels (December 31, 1922), is heavy oil. This oil, of asphaltic character, is not very satisfactory as a fuel oil due to its emulsified water, high sulphur contents and other properties."

"The general inquiry when a new Smackover well was brought in 'What will they do with it after they get it?'

"One leading oil man stated that Smackover 'Heavy crude' had everything in it it should not have for a refinery. Yet, despite these pessimistic statements, Smackover heavy oil is being commercially cracked into over 10% gasoline. Smackover heavy crude oil production of 163,000 barrels daily can be converted into 81,500 barrels of gasoline per day by the cracking process."

The results achieved from the Kevin Sunburt Fuel Oil presages those which will be accomplished by the Cracking Plant in treating the crude oil from the Wainwright field, as the chemical composition and gravity of the oils are almost identical.

"The Dubbs Process is so flexible that it converts any type of oil without change of principles or equipment into gasoline. Commercial plants are in operation or under course of construction in various parts of the world, such as Japan, Borneo, Java, and Dutch West Indies, Australia, Romania, and many parts of the United States."

REFINERIES Distributors Ltd. was organized with a Dominion Charter, capitalized at \$1,000,000, divided into 90,000 8% Preference Shares with a par value of \$10.00 each; and 100,000 Common Shares with a par value of \$1.00 each. Paid up capital is \$200,000.

The company was organized to market the "PEP" products of the Albert Refineries Ltd., and also to produce gasoline and other products from crude petroleum by means of a cracking plant, this plant employing the Dubbs process, a great scientific and economic advance over the ordinary refining plant, extracting from 3 to 5 times as much gasoline from the crude oil.

The present issue, for the purpose of carrying on the immediate program of the company, is 30,000 Preference Shares, of which 10,000 shares have already been sold. The Preference Shares are offered in units of 1 at par \$10.00, and each of these Preference shares carries a bonus of 1 Common Share.

The initial program of the company is to erect and maintain a number of Service Stations throughout the Province for the marketing of "PEP" gasoline and petroleum products, a profit of 3c per gallon clear of freight being available from this source alone at the present market prices.

Also to erect a "Cracking Plant" at a cost of \$150,000. This will have a capacity of 1,000 bbls. of crude oil and will produce from this a minimum of 500 bbls. of anti-

knock gasoline every twenty-four hours. At 35 gallons to the barrel, this shows a total output of 17,500 gallons a day.

Apart from the individual profit of the cracking plant unit working at capacity, the output marketed through the service stations shows a distributing profit of \$525.00 per day net. This alone will show a handsome dividend on a \$1,000,000.00 capitalization in addition to the 8% per annum on the preferred shares.

Detailed figures will show this enterprise to be one of the very highest potentiality for profit. We shall be pleased to send a digest of the situation, based upon actual conditions, to the earnest investor.

In the meantime the soundness of the proposition will appeal to the investor who realizes that these pioneer enterprises in industry based directly upon natural resources, reap the rich reward.

**FREE "PEP" TO READERS OF BULLETIN "SMALL ADS."**

Automobile Owners, Attention!

Every day, beginning tomorrow, Wednesday, and continuing until further notice, an auto owner, reader of The Bulletin "Small Ads," will receive five gallons of Pep gasoline free.

The Bulletin staff will select the automobile license number of a car in some part of the city or district.

This number will be published somewhere in the "Small Ads" pages. The owner of that number, finding it in the "Small Ads" and bringing his car to the Bulletin office up to 6 p.m. on the following day will get an order for
